Introduction
Background Information and Aim

This report provides a summary of statistics on tourism in Scotland’s Dumfries and Galloway region. It gathers information from a suite of tourism monitors managed by VisitScotland’s Insight Department, and other national statistics and commissioned research.

Most of the statistics are produced from surveys. The primary surveys used are:

- **The Great Britain Tourism Survey** (GBTS) that provides data for overnight visitors resident in Scotland, England and Wales. The survey is conducted through face-to-face interviews and is jointly commissioned by VisitScotland, VisitEngland and VisitWales. More information about the survey can be found on visitbritain.org.
- **The International Passenger Survey** (IPS) which is run by the Office for National Statistics (ONS). This survey provides data for overseas visitors. Details about the survey and methodology used can be found on the ONS website and the VisitBritain website. **Please note:** In 2020, the methodology of IPS was revised to represent more accurately international visitors and all data was recalculated back to 2009. As a result, international figures in this report might differ from, and supersede, previously published IPS data.
- **The Great Britain Day Visits Survey** (GBDVS) that provides data for tourism day visitors resident in Scotland, England and Wales. More information about the survey can be found on visitbritain.org.
- **The Scottish Accommodation Occupancy Survey** (SAOS) that provides data on occupancy in Scotland’s tourist accommodation sectors.

While results from these surveys can give good precision at national level, at regional level they can be less reliable because they can be based on a relatively small sample size. This incurs a larger margin of statistical error reducing data reliability. Therefore results should be treated with caution.

To reduce error margins, it is sometimes useful to take an average over three years to provide a larger sample size. In this report, 3-year average figures have been calculated to provide a more robust basis for analysis of detailed data such as visitors’ region of residence, purpose of travel, or seasonality of trips.

Annual visitor figures are provided on pages 6 and 7, as well as in the form of a historical trend chart on page 9. These ensure the publication is consistent with other regional factsheets published on visitscotland.org and indicate changes in tourism performance over time. Yet, it is recommended to refer to the 3-year average figures on page 3 when analysing volume and value of tourism in the region.

There are some differences between regions as identified by the GBTS and GBDVS, IPS, and SAOS.

This report starts with an overall evaluation of Dumfries and Galloway tourism performance in 2019. It then looks in more detail into the international and domestic overnight visitors to the region. Lastly, the report focuses on tourism day visits and the historical trend of tourism performance in the region since 2013.

National figures are available in the Key Facts on Tourism in Scotland 2019 report published on visitscotland.org.
Visitors to Dumfries & Galloway
Tourism Performance | 2019

In 2019, tourism performance in Dumfries and Galloway was typical for the past several years (2013-2019), with no drastic increases or decreases in visitor arrivals or spend. While the number of overnight trips declined from 2018, it was above the figures recorded in 2016 and 2017.

Between 2017 and 2019, the region hosted 735,000 overnight trips per year on average, a 3% increase from 2016-2018. The number of bednights was nearly 2.6 million annually (-2%), while overnight tourism expenditure totalled at £148 million (+1%).

The slight increase in visits to Dumfries and Galloway in 2017-2019 was driven by a rise in domestic travellers who made just under 700,000 overnight trips to the region per year. This represents 95% of all overnight trips, making Dumfries and Galloway the region with the highest proportion of British travellers in the whole of Scotland. Most of the domestic visitors are residents of England and Wales – they accounted for 59% of the overnight trips and 63% of the overnight tourism expenditure in Dumfries and Galloway between 2017 and 2019.

International visitors made less trips to Dumfries and Galloway in 2017-2019, mostly as a result of a 14% drop in European travellers to the region. Despite that, bednights and spend grew by 17% and 6%, respectively, from 2016-2018.

After increasing significantly in 2016-2018, domestic tourism day visits to Dumfries and Galloway continued to rise, reaching 5.7 million per year in 2017-2019 (+7%). Associated day spend declined slightly by 2%.

II. International Visitors to Dumfries & Galloway
Overnight Tourism

The 8% decline in international trips to Dumfries and Galloway in 2017-2019 did not produce a drop in visitor spend which grew by 6% from 2016-2018. The number of bednights rose more significantly by a sixth suggesting a big increase in overseas visitors’ average length of stay. Indeed, three in four visitors to the region between 2017 and 2019 stayed longer than a week. While the most popular reason to visit Dumfries and Galloway is to go on a holiday, visiting friends and relatives is a strong driver for international travel to the region accounting for 35% of all trips in 2017-2019. For Scotland, this share is 26%.

III. Domestic Visitors to Dumfries & Galloway
Overnight Tourism

In 2019, domestic overnight tourism to Dumfries and Galloway saw a decline from 2018 which was mostly a result of a drop in holiday travel and in visits lasting up to three nights. The total number of trips and bednights decreased by 7% and 4%, respectively, while tourism expenditure declined by 13% to £122 million. The region attracted 5.1% of the domestic overnight trips and 3.8% of the domestic tourism spend in Scotland in 2019. Between 2017 and 2019, 64% of the British travellers to Dumfries and Galloway were holidaymakers. Spring visits continued to increase, while winter travel decreased from 2016-2018.

Visitors to Dumfries & Galloway
Historical Trend Information | 2013 - 2019

While overnight trips to Dumfries and Galloway declined from just over 800,000 in 2018 to 740,000 in 2019, they were well above the estimates for 2016 and 2017, and 2% above the annual average for the 2013-2018 period. This was underlain by the number of domestic visits which was the third highest since 2013. The same observation does not apply to total expenditure which in 2019 was the lowest in three years and 5% below the 2013-2018 annual average. Despite some notable annual variations, overnight tourism performance in the region has been relatively consistent up to 2019. There was no significant change in the total volume and value of trips from 2014-2016 to 2017-2019.

Appendix

USING AND INTERPRETING STATISTICAL DATA
Sources: Data is sourced from the Office for National Statistics’ International Passenger Survey (IPS), The Great Britain Tourism Survey (GBTS), The Great Britain Day Visits Survey (GBDVS), Scottish Accommodation Occupancy Survey (SAOS), Moffat Centre’s Scottish Visitor Attraction Monitor (VAM) and ONS’ Scottish Annual Business Survey (SABS).

SAMPLE SIZES
Analysis of sub-groups, such as trips by purpose or demographic group, relies on smaller sample sizes that can be unreliable. Where this is a particular issue, methods to aggregate data, such as using a 3-year average instead of single-year data, have been used. Before using the data, it is important to recognise the limitations of using a small sample size. Further information, including methodology and sample sizes, can be found on the VisitBritain website www.visitbritain.org (Insights & Statistics section).
